

JWA Lean Healthcare Seminar Series

Success as a Lean Healthcare System requires extensive knowledge of Toyota-based principles, philosophy and methodology. The JWA Lean Healthcare Seminar Series is designed to support both knowledge acquisition and practical application through lecture, simulation, written case studies, onsite case studies and teaching practice.

JWA is proud to continue its collaboration with a long-time client, Seattle Children’s Hospital. This collaboration allows seminar participants to learn from executives and managers, physicians, nurses and staff during the Seattle Children’s CPI Showcase. The two-day Showcase is followed by a five-day Lean Leader Training offered by JWA. Case studies provided during Seattle Children’s Showcase will be discussed in-depth during the Lean Leader Training.

Please note the pre-requisites listed below for each seminar. Pre-requisites have been established to ensure that participants get the most out of their investment. Please refer to the JWA Registration Form for seminar discounts and cancellation policy.
